128.10 Chakra Two (Sacral)

The seven main chakra centers are aligned along the spinal column. If there are disturbances on any level, this shows in the chakra's vitality level. Also each of the seven main chakras is their own intelligence center. This means that each chakra is not only associated with our physical health but also controls aspects connected to our emotional, mental and belief system.

When one part of a chakra center is out of sync it may eventually effect its other parts and possibly its neighboring chakra. When a chakra center is out of balance it generally means that it is over-active or under-active, or possibly congested or blocked. If this happens it is usually felt on a mental, emotional or physical level.
